- *It is available in full bed and thin stone veneer.*
- *Thin Stone is priced by the sq. ft. Stock pallets are 50sf, 100sf or 200sf.*
- *Corners are priced and sold by the linear foot.*
- *You may special order any stone to your specific quantity.*

### Stone Cuts

**Mosaic**

**Square & Rec.**

**Ledge**

**Ashlar**

***Thin Stone Veneer*** is the sawn facings of traditional "full bed" building stone veneer. Whereas traditional building stone veneer typically ranges in thickness (depth) from 3" to 5" and requires a bearing shelf, thin veneer products vary in thickness between  $\frac{3}{4}$ " and  $1\frac{1}{4}$ " and do not require any special foundations. 90° angle cuts taken from the interior of full bed cutting stock produce thin veneer corners that help conceal the overall material depth.

*Thin veneer stone installs quickly and easily over a wide variety of substrates allowing for greater versatility in installation.*
